Prompt Publication of Papers

Readily acceptable papers Submitted to this journal Now can be published in 4 to 5 months From date of submission

This is made possible by the Journal's change of frequency from monthly to semimonthly and through the now completed assimilation of a backlog of manuscripts.

Forward manuscripts to:

Dr. W. MAXWELL COWAN
Managing Editor
Department of Anatomy
Washington School of Medicine
660 South Euclid Avenue
St. Louis, Missouri 63110

THE JOURNAL OF COMPARATIVE NEUROLOGY

A New International Research Journal

TERATOLOGY

THE INTERNATIONAL JOURNAL OF ABNORMAL DEVELOPMENT

Abnormal embryonic development is a major concern of scientists in many basic and applied fields of endeavor. The aim of medicine is to ameliorate or prevent malformations; that of biology is to discover its origins and thus widen understanding of normal developmental processes.

TERATOLOGY serves as a forum for the exchange of the latest information and ideas, of the widest diversity, in the hope of furthering the many purposes of its readers.

TERATOLOGY publishes original reports of research and studies in all areas and aspects of abnormal development having embryonic origins. Such topics include the experimental induction of malformations; gene- and chromosome aberration-induced maldevelopment; population studies of the causation and frequency of malformations in man and other animals and their association with various attributes; and laboratory and clinical studies and case reports of interest or significance. Articles are also welcome that deal with other subjects of relevance to teratology, which may illuminate the problems of maldevelopment, such as aspects of reproductive physiology and pathology, experimental embryology, and molecular and cellular differentiation. Work with all organisms is acceptable. Contributors need not be members of the Teratology Society.

PUBLISHED BIMONTHLY

FEBRUARY • APRIL • JUNE • AUGUST • OCTOBER • DECEMBER

$18.00 per year in U.S.A. $20.00 all other countries

Published jointly by the Teratology Society and
The Wistar Institute of Anatomy and Biology

First complete volume published in 1968. All volumes available.
